

# INDEX

- Alternative Route-teacher certification 83–85
- Assessment of Autism
  - Adaptive skills 195–198
  - Checklist and rating scales 188–191
  - Cognitive 193–195
  - General screening 184–185
  - Observational methods 191–193
  - Neurological 199–202
  - Specific screening 185–187
  - Theory of mind 198–199
- Autism and the aging process 45
- Autistic savants 33
- Autism Spectrum Disorder
  - Defined 92
  - Clinical symptoms 236–239
- Behavioral inflexibility 54
- Brain energy 24
- Brainstem 43
- Childhood Disintegrative Disorder 93
- Central Coherence Theory 10
- Cerebellum 42
- Cognitive Theories 4
- Communication patterns 134
- Communication/comprehension aspects of language 138
- Complex utterances 137
- Concrete and literal comprehension 137
- Counseling concerns for professionals
  - Improving decision making 247
  - Intervention for social skills 244
- Counseling Concerns for parents
  - Expressed emotions 218–219
  - Guidelines for discipline 229–230
  - Parent perspective 214–216
  - Professional role 216
  - Specific counseling issues 216–218
  - Theoretical perspectives 212–214
  - Treatment issues 227–229
  - Typical responses 224–225
- Curriculum
  - Critical questions 128
  - Cultural pluralism 167–168
  - Guidelines for selection 127–128
  - Management of behavior 116–121
  - Social interaction strategies 121–127
  - Strategies for language 111–116
- Diagnosis of autism 181–189
- Dynamical Systems Theory (DST) 54
- EEGs 43
- Effective teacher behaviors 71
- Effective teacher preparation 74
- Energy-transformation systems 57
- Environmental-neurological-cognitive-behavioral system 53
- Executive function deficits 7
- False Beliefs Task 5
- Functional magnetic resonance imaging (fMRI) 44
- Future neurological research 44
- Information-Processing Theory (IPT) 57
- Inservice Training For Teachers
  - Information Utility Model 95–103
  - Models 94–95
  - Principles 101–102
  - Topics 102
- Irrelevant detail 136

- Joint attention 13
- Language development 133
- Limbic system 42
- Maximum-Power Principle 25
- Medication Management Concerns
  - Benefits 264
  - Categories of drugs 262–264
  - Current practice 259–262
  - Hazards 264–266
  - Prevalence 263
  - Symptoms 261–262
  - Value of medication 257–259
- Multicultural Perspectives
  - Etiological theories 152
  - Family adaptation to autism 159–163
  - Prevalence issues 154–159
  - Resource concerns 172
  - Teacher expectations 165–166
  - Teacher preparation concerns 169–172
- Neuroalgorithms 56
- Neurobehavioral architecture 19
- Neurological flexibility 22
- Neurological interconnectivity 21
- Normal neurological development 20
- On-line processing 140
- Overload 23
- Peer mediated instruction 121
- Pervasive Developmental Disorder 93
- Perception 23
- Pivotal response training 122
- Positron emission tomographic (PET) scans 43
- Preparing teachers 80–83
- Professional standards vs special education 77–80
- Purkinje cells 42
- Reaction time (RT) paradigms 57
- Reading comprehension 141
- Resources 252–254
- Rett's Disorder 93
- Semantic/pragmatic language instruction 115–116
- Sensory overload 23
- Social cognitive development 225–227
- Social Impairment Theory 12
- Social rules 137
- Social stories 125
- Special education litigation and legislation 76–77
- Sternberg reaction-time task 58
- Structural magnetic resonance imaging (MRI) 42
- Theory of Mind 4
- Unpredictability 21
