

List of Contributors

Numbers in paranthesis indicate the pages where the authors' contributions can be found.

Namkee Ahn (237) has a Ph.D. from SUNY – Stony Brook. He has been a visiting faculty member at Yale University and the University of the Basque Country in Bilbao. Since 1998 he has been a researcher at FEDEA (Applied Economics Research Center) in Madrid. He has research interests in the areas of economic demography, labor markets, health and aging and has published extensively in these areas in demography and economics journals.

Patricia Apps (205) is professor of public economics in the law faculty at the University of Sydney. She received her Ph.D. from the University of Cambridge and is visiting faculty member in the Economics Program of the Research School of the Social Sciences at the Australian National University. She is a Fellow of the IZA and since 1994 a Fellow of the Academy of the Social Sciences in Australia. She has published in most of the major scholarly journals in economics, specializing in issues in taxation and labor economics. Her recent research has been concerned with the measurement of economic well-being and with the economics of the family.

Jens Bonke (43) is head of the globalization, society and welfare research program at the Danish National Institute of Social Research. He been a professor at the University of Copenhagen, a Jean Monnet Fellow at the European University Institute, and a visitng professor at the University of Rome – I (La Sapienza). His main research topics are income distribution, poverty, time use and time allocation, household economics, welfare studies, and related gender issues.

Nabanita Datta Gupta (43) is associate professor of economics at the Aarhus School of Business, Aarhus, Denmark. She holds a Ph.D. from Cornell University and has been a visiting professor there and an assistant professor at the New Jersey Institute of Technology. Her research focuses on gender wage differentials, occupational choice, fertility, health, retirement behavior and pension systems, and labor markets in developing countries.

René Fahr (175) studied Economics, Philosophy, and German Literature at the University of Bonn. He received his Diploma degree in 1998. He did postgraduate studies in the European Doctoral Program (EDP) at the Bonn Graduate School of Economics and at the London School of Economics. After doing research at the Centre for Economic Performance and at IZA, René Fahr received his Ph.D. in 2003 from the University of Bonn. He worked at IZA as a Research Associate. René Fahr began as an Assistant Professor at the University of Cologne in November 2003.

- Daniel S. Hamermesh** (1, 79) is Edward Everett Hale Centennial Professor of Economics at the University of Texas at Austin. He taught at Princeton and Michigan State, has held visiting professorships at universities in North America, Europe, Australia and Asia. He is a Fellow of the Econometric Society and Past President of the Society of Labor Economists and of the Midwest Economics Association. His research has concentrated on labor demand, time use, social programs, and unusual applications of labor economics (to suicide, sleep and beauty).
- Diane E. Herz** (317) is Chief of the American Time Use Survey Branch of the Division of Labor Force Statistics at the Bureau of Labor Statistics. She has managed the ATUS program since 2001. Before that she worked as an economist at BLS. Publications include articles on retirement and pension trends, employer-provided training, and the employment characteristics of women, older workers, displaced workers, and the working poor. She has a bachelor's degree in economics from the University of Maryland College Park and a masters in management information systems from Nova Southeastern University.
- Michael W. Horrigan** (317) is Assistant Commissioner in the Office of Occupational Statistics and Employment Projections at the US Bureau of Labor Statistics (BLS). Mr Horrigan also has directed the BLS Establishment Surveys of Employer-Provided Training and served as Director of the BLS National Longitudinal Surveys Program. He holds a doctorate in Economics from Purdue University, taught at Williams College, and is the author of articles on unemployment duration, earnings inequality, and measuring the demand for skills in the labor force.
- Andrea Ichino** (263) is Professor of Economics at the European University Institute in Florence, and taught at Bocconi University, Milan, before that. He received his Ph.D. from MIT. He is Editor-in-Chief of *Labor Economics*. His current research interests are personnel, economics, the econometric evaluation of labor market policies, family networks and unemployment in Europe, and education and labor market outcomes.
- Joyce P. Jacobsen** (19) is Andrews Professor of Economics at Wesleyan University. She is co-author (with Gil Skillman) of *Labor Markets and Employment Relationships* and author of *The Economics of Gender*. She has taught at University of Groningen, Harvard University, Northwestern University, and Rhodes College, and has degrees in economics from Harvard, LSE, and Stanford University. Her research is mainly in the area of employment and earnings differences by gender and race, with side interests in the economics of collectibles and history of economic thought.
- Stephen P. Jenkins** (113) is a Professor at the Institute for Social and Economic Research at the University of Essex, a research professor at DIW Berlin, and research fellow of IZA, Bonn. He is a past President of the European Society for Population Economics (ESPE), and currently serves as an elected member of the Councils of ESPE and the International Association for Research in

Income and Wealth. His research interests are inequality and poverty, especially their longitudinal dynamics, labor economics and time use, and applied econometrics, especially survival analysis.

Juan F. Jimeno (237) has a Ph.D. from MIT and has been a visiting lecturer at the London School of Economics. He is currently professor of economics at Universidad de Alcalá (Madrid), researcher at FEDEA (Applied Economics Research Centre), and a research fellow of the Centre for Economic Policy Research (CEPR) and IZA. He has published in leading economics journals on issues of European labor market policy. His current research interests span labor economics and macroeconomics.

N. Anders Klevmarken (149) is professor of econometrics at Uppsala University. He has taught at Stockholm University, the Stockholm School of Economics, and the Gothenburg University, where he took a chair in statistics in 1976. From 1985 to 1994 he was professor of econometrics at the Swedish Council for Humanities and Social Sciences. He was a visiting professor/scholar at the University of Georgia and the University of Michigan. In 1992 he was the president of the European Society for Population Economics. Klevmarken initiated the Swedish household panel survey Household Market and Nonmarket Activities (HUS.). Most of his research falls within the area of applied microeconometrics, including applications to labor economics, demand analysis, time use, distributional issues, and microsimulation.

Peter Kooreman (19) is a professor of economics at the University of Groningen, The Netherlands. He published primarily in the areas of household behavior and public economics, in journals including the *American Economic Review*, the *Journal of Public Economics* and the *Journal of Political Economy*. He is a former president of the European Society for Population Economics. He currently serves on the editorial boards of the *European Economic Review*, the *Journal of Applied Econometrics* and the *Journal of Population Economics*. His current research interests include the empirical analysis of social interactions and bounded rationality.

Lars Osberg (113) is currently McCulloch Professor of Economics at Dalhousie University. He is a past President of the Canadian Economics Association and currently serves as a member of the Executive Council of the International Association for Research in Income and Wealth. His recent fields of research interest have been poverty and economic inequality, the measurement of economic well-being and the implications of international working time differences.

Gerard A. Pfann (1) is professor of econometrics at Maastricht University in the Netherlands. He has been a visiting professor at the University of Chicago Graduate School of Business, and was Research Director of the Institute for the Future of Work (IZA). He founded the *Journal of Empirical Finance*, acting as editor from 1993 until 1998, and is currently managing editor of the *European Economic Review*. He received a KNAW Research Fellowship, a Fulbright Award, the Edmond Hustinx Medal for Academic Excellence, and an NWO

PIONIER Research Award. His research interests are empirical econometrics applied to labor, investment, human resources, industrial organization and public policy.

Ray Rees (205) is professor of economics at the University of Munich and a faculty member at the University of York. Educated at the London School of Economics, he has been a visiting professor at Northwestern University, Australian National University, and numerous universities in Europe. He has published in many leading economics journals, writing in areas of industrial economics, public finance and labor economics. He serves on the Board of the CES-Ifo Institute and is a Fellow of the IZA. His current research deals with issues of insurance regulation, labor supply and the economics of the family.

Anna Sanz de Galdeano (263) received her Ph.D. from the European University Institute in 2003. She is a member of the Centre for Studies in Economics and Finance at the University of Salerno, Italy. She has held visiting positions at the Universidad Carlos III in Madrid and at the Research Department of the European Central Bank. Her research interests include labor economics, applied microeconometrics and household economics.

Nina Smith (43) is professor of economics at the Aarhus School of Business, Aarhus, Denmark. She is also a research professor at the German Institute for Economic Research in Berlin and a research fellow of the IZA. She has been chair of the Council of Economic Advisors of the Government of Denmark and is currently a member of Statistics Denmark and the Danish Social Science Research Council. Her areas of research include gender wage differentials, migration and integration of immigrants, labor supply and taxation, income inequality and income mobility.

Frank P. Stafford (289) is a Senior Research Scientist at the Institute for Social Research and Professor of Economics at the University of Michigan. He has served as Director of the Panel Study of Income Dynamics since 1995 and is the Principal Investigator for the on-going Child Development Supplement of that study. Recently he has worked to develop a series of on-line tutorials for students to access the PSID archive and address intergenerational relationships. His research interests include time investments in young children, influences of wealth and income on health and family well-being over the life course, and the role of information technology in the labor market, and in the factors shaping the development of young children.

Arantza Ugidos (237) has a Ph.D. from SUNY – Stony Brook and is currently associate professor in the Department of Economics at the University of the Basque Country in Bilbao. She has research interests in labor economics and economic demography. She has published in economics and demography journals on gender discrimination, unemployment, education and fertility. Her current research interest focuses specifically on time use and the determinants of gender differences in earnings.

W. Jean Yeung (289) is a Senior Research Scientist at the Center for Advanced Social Science Research, Department of Sociology, New York University. Prior to joining NYU, she was a co-principal investigator of the Panel Study of Income Dynamics at the Institute for Social Research in University of Michigan. Yeung's recent publications include studies of the role of income and time in child development and life chances and have appeared in the leading academic sociology journals. Her research interests include inter-generational studies, children, poverty, demography, and research methods, gender wage differentials, migration and integration of immigrants, labor supply and taxation, income inequality and income mobility.
