

INDEX

- AAA-rated securities, 146
Akaike Information Criterion (AIC), 262
Alert Mechanism Report, 360
Andor, László, 93
Anti-growth bias, 123
Arellano-Bond's Generalized Method of Moments methodology, 396
Asset-backed securities purchase programme (ABSPP), 8
Asset purchase program (APP), 132
Assets cross-ownership, analysis of
 asymmetry of GDP vs asymmetry of GNP and income, 170
 country-by-country measure of fluctuations, 167
 EU 1971–2014 (panel data estimations), 168–169
 gains from risk-sharing, 166–167, 169–170
 identical CRRA utility and rate of time preference, 166–167
 level of risk-sharing, 165–169
 methodology, 165–167
 sensitivity of regional income to idiosyncratic GDP fluctuations, 165–166
Augmented Dickey-Fuller (ADF) test, 262
Austerity policies, impact of, 77–78, 96–97, 120, 231

Bail scheme, 205
Balance sheet operations, 144
Baltics and South-Eastern European economies, 358

Banking Union, 70
 architecture and design, 216
 balance sheet assessment, 209–211
 blueprint, 204
 capital requirements for banks (CRD IV package), 204
 deficiencies and criticisms of, 211–218
 emergence of a moral hazard and, 216
 European Supervisory Authority (EBA) for, 207
 European Systemic Risk Board (ESRB) for, 207
 guarantee schemes, 205
 key success factor in, 196
 main pillars of, 203–206
 political support, 217
 reasons for establishment of, 199–203
 risks with, 196
 single rulebook, 205
 SRM and SSM implementation, 203–206
 theory of optimal currency area-based, 197–199
Bank of England (BoE), 149
Bank Recovery and Resolution Directive (BRRD) – Directive 2014/59/EU, 71
Bank-sovereign doom loop, 118
Beggars-thy-neighbor policy, 96
Beta-convergence of individual financial markets, 177–179, 182–185
Bilateral trade balances, 247

- Bond-buying programme, 146
 Breusch-Godfrey test, 342, 346
 Brexit, 82
 Bundesbank, 119–120, 127, 131, 138n8
- Capital flows and its impacts on fiscal imbalances, study
 data sources, 342–343
 descriptive statistics, 343–351
 facts for European Union, 336–340
 General Government Debt (GGD), 345, 350
 hypotheses, 334
 literature review, 335–336
 marginal explanatory variable (MEXVAL), 349–350, 353n2
 methodology, 340–342
 Net International Payment Positions (NIPP), 343, 345–346, 349–350
 net lending (NLB), 349
 policy implications, 351–353
 problems of Non-Performing Loans (NPL), 351
 seemingly unrelated regression (SUR) technique, 340, 345–348
- Central, Eastern, and South-Eastern Europe (CESE), 359
 Central and Eastern European countries (CEEC), 359
 Central banks, functions of, 117
 Central European economies, 174
 Central government debt in selected countries, 424
 Cholesky identification scheme, 260
 Citizens' Euroscepticism, reflection on, 40
 economic conditions, in case of, 38
 fixed effect estimates, 35–39
 ideological extremism, impact of, 35, 38
 non-mainstream parties *vs* mainstream parties, 38
 opinion of the electorate as determining factor, 35, 38
 ordered logit and fractional logit results, 35–39
 party characteristics, influence of, 35
 political elites' support, 40
 relationship between incumbent support and orientations toward Europe, 35
 role of economic conditions, 36–38
 troubled economies, in case of, 38–40
 in virtuous economies, 40
 Common currency, 194–195
2010 Communication, 52–53
 Community method, 68
 Competitiveness, 74, 225–230
 austerity measures and, 231–232
 balance of payment (BOP) implications, 231
 Business School's view of, 225
 causal mechanism associated with, 234–235
 economic growth and, 227
 Euro Institutions view's of, 229
 high technology (HT) productive structures *vs* low technology (LT) productive structures, 225–227
 improvements in productivity, and, 225
 inflationary adjustments and, 229–230
 issues within the Euro Area, 246–247
 labor costs-determined, 266
 labour costs, 228
 long-term dynamics of, 247

- macroeconomic imbalances and, 230–235
