Disaster Prevention and Management

An International Journal of

Disaster Prevention and Management: An International Journal (DPM) sets out to advance the available knowledge in the fields of disaster prevention and management and to act as an integrative agent for extant methodologies and activities relating to disaster emergency and crisis management. Publishing high quality, refereed papers, the journal supports the exchange of ideas, experience and practice between academics, practitioners and policy-makers.

Coverage includes:

In-depth case studies of international disasters; top management attitudes to safety; health effects of disasters; and public attitudes and actions regarding disaster prevention.

Benefits and features

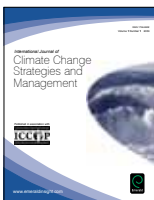

- Access the world's most comprehensive forum for disaster management for academics and practitioners alike.
- Learn how to plan for the unknown and react positively to crisis situations.

International Journal of

Climate Change Strategies and Management

In the history of science there have been only a few issues which have mobilized the attention of scientists and policy-makers in the same way as the current issue of climate change. The International Journal of Climate Change Strategies and Management (IJCCSM) addresses the need for disseminating scholarly research, projects and other initiatives, such as new policies, strategies or action plans, which may lead to a better understanding of the subject-matter of climate change.

Coverage includes:

Climate change; global warming; mitigation; adaptation; natural variability; disasters; planning processes; oceans; terrestrial ecosystems; and El Niño.

Benefits and features

- IJCCSM is the world's first journal to address climate change issues in a holistic way, bearing in mind the social, economic/political and scientific elements that are part of the process.

Published in association with:

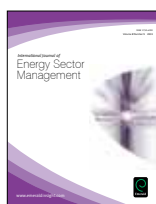

“In the present era the effects of climate change on human health and welfare are really tragic. There are two critical issues to address, which are strategy development and technology management. *IJCCSM* is uniquely placed to cover these issues, providing a special platform for researchers, scientists and policy makers. It publishes high-quality papers in the area.”

Ibrahim Dincer, Chairman, Global Conference Series on Global Warming

International Journal of

Energy Sector Management

The *International Journal of Energy Sector Management (IJESM)* aims to focus on holistic, applied research on energy sector management and to disseminate practical solutions to difficult decision-making problems by providing a common forum for wider interaction, information sharing and publication of relevant applied research, thereby trying to bridge the gap between industry and academia.

Coverage includes:

Management of scarce resources, projects, activities and concerns, technologies and knowledge; business

strategy, policy and planning and decision support systems for energy sector management; business organization, structure and environment; globalization and multi-cultural management; and management of innovation, change and transition.

Benefits and features

- *IJESM* discusses the key problems and issues faced by managers in the energy sector and demonstrates common mistakes and best practice.

Management of Environmental Quality

An International Journal

Management of Environmental Quality: An *International Journal (MEQ)* has become a highly respected international forum for the serious debate of environmental issues and their effect on human health. By analyzing ways in which industrial and agricultural bodies can manage our environment responsibly, the journal presents major research findings, warnings of potential dangers to health and suggestions for different codes of practice to safeguard our environment and health.

Coverage includes:

Environmental protection; nutrition, drugs and genetic engineering; pollution control; radioactive waste; stress and disease; toxic products; waste disposal; and water resources.

Benefits and features

- *MEQ* is the only academic journal which examines the direct effects of environmental management on health.

Advances in Ecopolitics

Advances in Ecopolitics includes a range of publications which each discuss a significant element in the environmental theory which now represents an important aspect of sustainable living. The series provides insights into real alternatives to the current economic malaise, with an examination of key themes such as transition towns, sustainable Utopias, co-operative farming, sustainability and activism, ecofeminism, green protectionism, intentional communities, environmental justice, environmental movements, green philosophies, politics and green economics. **Advances in Ecopolitics** provides a forum for debate about a

positive set of sustainable alternatives which set out an understanding that “another world is possible”.

Coverage includes:

The series encourages well-written articles with the focus on interdisciplinary, international and comparative standpoints on contemporary management issues. Coverage includes, but is not restricted to: ecological politics; sustainable development; environmental philosophy; green party politics; environmental economics; environmental movements; ecofeminism; sustainable living practices.

Community, Environment and Disaster Risk Management

Community, Environment and Disaster Risk Management series links academic research to field practice, strengthening the links between the environment, disaster and community. The series will be developed on field evidence and community practices, and thus will provide specific guides for professionals which are grounded in rigorous academic analysis. **New volumes in the series will disseminate much needed research to the**

disaster management field, using the mode and method of education to create positive impacts.

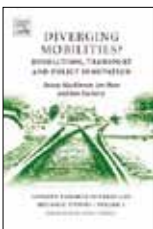

Coverage includes:

The series has a specific focus on community-based disaster management, urban environmental management, human security, water community, risk communication, climate change adaptation, climate disaster resilience and community-based practices.
