* Indexed by

Book series

- Advances in Librarianship
- Advances in Library Administration and Organization
- Library and Information Science

Key benefits

Current – new titles launched in the field are added to the collection as soon as they are available online, giving you access to the very latest research.

High quality research – peer-reviewed articles, featuring journals indexed by Thomson Reuters (ISI) and Scopus.

Compliant with industry standards – please refer to page 212 for more details.

Access to full training support and additional resources – please refer to page 214 for more details.

Subscription options

A subscription offers you access to the archive articles and chapters as well as perpetual access to all the content published during the years to which you subscribe.

For more information about Emerald Subject Collections please contact collections@emeraldinsight.com or visit our website at www.emeraldinsight.com/collections

“Emerald’s library and information science journals balance practice and innovation, ideas for today with research for tomorrow. Together they form a corpus that educates both the active professional and the student. Directors and beginners benefit equally from the international coverage and technology depth.”

Michael Seadle, Editor, *Library Hi Tech*, Institute for Library and Information Sciences, Humboldt University of Berlin, Germany

In “special partnership” with the International Federation of Library Associations and Institutions (IFLA)

Since 2010 Emerald has been a special partner of IFLA, cementing the good relationship which started during the IFLA/UAP Office at the British Library Document Supply Centre in the 1970s. Emerald has been an IFLA Gold Corporate Partner since 1998, and for more than a decade it has strengthened its involvement in IFLA’s activities, culminating in the sponsorship of the IFLA International Marketing Award, support of some IFLA satellite meetings and support of IFLA library initiatives and activities in Africa.

IFLA is the leading body representing the interests of library and information services and their users. It is the global voice of the library and information profession. Its members are national library associations, libraries of all types (national, academic, public, special) and library and information educational institutions (faculties, schools) in approximately 150 countries. It aims to:

- Promote high standards of provision and delivery of library and information services

- Encourage widespread understanding of the value of good library and information services
- Represent the interests of its members throughout the world.

IFLA’s worldwide membership represents the large and growing number of library and information professionals, estimated to be between 500,000 and 1 million! Librarians and information specialists get involved in the professional activities that IFLA performs, develop international contacts and contribute to the work of the Federation through IFLA groups called Sections.

Articles published in Emerald journals, which are based on papers presented at IFLA conferences or report the work of IFLA Sections, feature the IFLA logo.

Current Awareness Abstracts

A gateway to the essential readings from the world's leading library and information management titles

Current Awareness Abstracts: Library and Information Management Literature (CAA) is a vast abstracting and indexing database providing easy and rapid access to the latest research from the most important library and information management journals in the world, as determined by an external panel of experts.

Volume: 29
Print issues: 6
Internet issues: 12
Online archive: 37,000+ abstracts

Published in association with Aslib (the Association for Information Management), CAA provides online access to unique, easy-to-read structured abstracts of every library and information management article from the core 400 publications worldwide. Users can search and browse an archive of more than 37,000 abstracts going back to 1988, with new abstracts added each month, to quickly source the most current and relevant abstracts before linking to the full text.

CAA aims to keep practising librarians, information professionals, and library and information researchers, academics and students up to date with the latest trends and developments in the field and so also includes six hard-copy issues per year of the most important material in an easy-to-browse format.

Subject coverage

CAA covers all the major subject areas including:

- Librarianship and information science
- Records management and archiving
- Serials/collection management
- Indexing
- Managing library finances
- Library services
- Legislation
- Databases
- Information retrieval
- Website design
- Knowledge management
- Facilities
- Publishing/book trade

Journal coverage

Much of the added value that users derive from CAA comes from the knowledge that only periodicals of the highest order are included in the database. An independent Accreditation Board actively ensures that only the very best journals in the world are included and then reassesses this list on a regular basis. It is this expert guarantee of quality content that sets CAA apart from similar products – we have already done the hard work for users by filtering out substandard material and so they can be sure that all their results will be of the highest quality.

Key titles include:

- Aslib Proceedings (UK)*
- Business Information Review (UK)*
- Information & Management (The Netherlands)*
- Internet Research (UK)*
- Journal of Documentation (UK)*
- Journal of Global Information Management (UK)*
- Journal of Information Science (UK)*
- Journal of Knowledge Management (UK)*
- Journal of Librarianship and Information Science (UK)*
- Journal of Management Information Systems (USA)*
- Journal of the American Society for Information Science and Technology (USA)*
- Library Hi Tech (UK)*
- MIS Quarterly (USA)*
- Online Information Review (UK)*
- Program: Electronic library and information systems (UK)*
- The Electronic Library (UK).*

Full-text linking

CAA acts as a high-speed route to identifying and retrieving relevant full-text articles. Using link resolver technology, many librarians, academics, researchers and students use CAA as a time- and effort-saving method of pin-pointing articles quickly within their existing library collections.

Consulting Editor: Stuart James

Stuart James is the former University Librarian, University of Paisley, a post he held from 1989 to 2007. He is involved in a wide range of professional activities with the Library Association's Cataloguing and Indexing Group, the British Library's National Bibliographic Service Advisory Committee, and the Scottish Academic Libraries Co-operative Training Group, Having been Vice-President for two years, he was President of the Scottish Library Association for 2001. He is a regular contributor to journals and a regular speaker at library conferences.

Contents:

- More than 37,000 abstracts back to 1988 from the top titles in library and information management
- Accredited journal coverage list, approved regularly by independent experts
- Unique, easy-to-read structured abstracts not found in other services
- Six hard-copy journals of the best material in an easy-to-browse format
- New abstracts added each month
- All abstracts classified and keyworded
- Links to the full text from a choice of locations
- E-mail alerting services.

Benefits:

- **Recency** – users are always up to date with the latest trends and developments in library and information management, because article abstracts appear in the database immediately after journal publication, plus saved search alerts instantly notify users of material relevant to them.
- **Quality** – only the best publications in the world are included, so no time is wasted searching through substandard material.
- **Maximize existing resources** – link resolvers allow users to pin-point articles quickly within their own library collections.

Library and Information Studies

A leading collection in the field, with more than 35 per cent of titles indexed by Thomson Reuters (ISI).

Journal ISSN: 0001-253X Volume: 64 Print Issues: 6 Internet Issues: 6 www.emeraldinsight.com/ap.htm

Aslib Proceedings

New information perspectives

Aslib Proceedings: New information perspectives (AP) provides perspectives from information managers, providers, packagers and consumers of all kinds, and especially those from the related fields of journalism, electronic publishing, communication and internet studies. The journal brings currency, authority and accessibility to the reporting of current research, issues and debates in the broad area of information work.

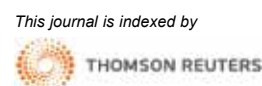

Coverage includes:

Information science; librarianship; journalism; electronic publishing; communication and internet studies; new media; and digital health studies.

Benefits and features

- AP is an interdisciplinary journal, providing a one-stop shop for the latest developments in the information studies field.
- A swift, but rigorous review process ensures that the latest research and innovations in this field are published without loss of currency.

Journal ISSN: 0888-045X Volume: 25 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/bl.htm

The Bottom Line

Managing library finances

The Bottom Line (BL) is concerned not only with practical operational matters such as budgeting, costing, charging, and fundraising but also with how this fits into the financial management of the organizations in which libraries and information services operate, e.g. academic institutions, local government, cultural institutions and companies. It covers the broad areas of accounting and auditing policy and practice; financial governance; taxation; regulation and compliance; and performance management and metrics.

Coverage includes:

Financial reporting; asset management; risk assessment; investment; liabilities; credit control; HRM; health and safety; environment; and economics.

Benefits and features

- The only international journal devoted to the financial aspects of library operations.

Editor

Dr Bradford Lee Eden
University of California Santa Barbara, USA

Journal

ISSN: 0160-4953 Volume: 31 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/cb.htm

Collection Building

Collection Building (CB) aims to provide well-researched and authoritative information on collection development for librarians in academic, public, company and special libraries. It will provide practical information on resource sharing, maximizing restricted budgets and the implications of change, particularly in the area of information technology. It will maintain a balance between theory and practice; continue to expand its international coverage; provide bibliographic essays to assist collection development librarians; and help librarians to improve their service to users.

Editor

Dr Kay Ann Cassell
Rutgers University, USA

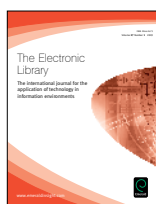

Coverage includes:

Collection development; resource sharing; new information formats; discussion on collection development policies and sample collection policies; and guidance on evaluating electronic resources for library collection.

Benefits and features

- Focuses solely on collections.
- Covers public sector developments.
- Includes international as well as North American perspectives for a broader perspective.

Journal

ISSN: 0264-0473 Volume: 30 Print Issues: 6 Internet Issues: 6 www.emeraldinsight.com/el.htm

The Electronic Library

The international journal for the application of technology in information environments

The Electronic Library (EL) aims to be a comprehensive source of information and knowledge on the applications and implications of new information and communication technologies, automation, user interfaces, networks and the web in all types of libraries, information centres and museums throughout the world.

Editor

Dr David Raitt

Benefits and features

- Regularly publishes the best work out of the LIANZA, ALIA and ZA-WWW conferences.
- Provides a broad experience, by informing readers regarding things about which they might not otherwise hear.

This journal is indexed by

Coverage includes:

Libraries and the web; the digital library; software and hardware developments; library automation; integrated library systems, OPACs; user interfaces – web usability; internet access and use; e-books and e-journals; e-governance and e-readiness; and online and distance learning.

Journal

ISSN: 0264-1615 Volume: 40 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/ilds.htm

Interlending & Document Supply

The principal aim of libraries and information centres is to provide relevant and timely information to their client group. **Interlending & Document Supply (ILDS)** offers expert analysis and practical recommendations on all aspects of the supply of information through the library network. It evaluates traditional methods, as well as new approaches made possible through technological innovation, both nationally and internationally.

Editor

Mike McGrath
Consultant and Former Head
of UK Marketing, The British
Library, UK

interlibrary lending and document supply activity; and international co-operation.

Benefits and features

- ILDS is viewed as the best international journal in the field.
- The journal regularly publishes literature reviews.

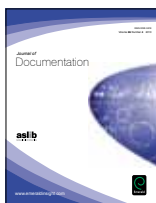

This journal is indexed by

Coverage includes:

Networking and resource sharing; copyright issues; worldwide developments in new technology; international

Journal of Documentation

Journal of Documentation (JD) has been publishing the best in information research for over six decades. This highly regarded journal, with its long and distinguished history, provides a forum for the dissemination of scholarly articles, research reports and critical reviews in the information sciences. It provides a link between research and scholarship and reflective professional practice, so that all are informed and enhanced. The journal regularly achieves the highest citation ratings in Thomson Reuters (ISI) for comparable titles.

Coverage includes:

Information science and librarianship; information and knowledge management, and information retrieval;

records management and archiving; national and international information policy; human information behaviour and the sociology of information; and information and digital literacies.

Published in association with Aslib, The Association for Information Management

This journal is indexed by

Journal ISSN: 0737-8831 Volume: 30 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/lht.htm

Library Hi Tech

This international journal allows one to explore the strengths and weaknesses of current and emerging technologies, and offers continuing education about the issues and options facing libraries. Library Hi Tech (LHT) combines research articles, case studies and literature reviews with regular columns to give a greater understanding of technology, as well as a look at the full range of tools that librarians and their customers employ.

Coverage includes:

Library information technology; integrated library systems; networking; strategic planning; archiving; digital libraries; and metadata.

Benefits and features

- Routinely publishes some of the most important writers on library technology.
- Publishes authors from the UK, Germany, Africa and Australia.
- Provides in-depth coverage via topical, themed issues.

This journal is indexed by

Journal ISSN: 0741-9058 Volume: 29 Print Issues: 10 Internet Issues: 10 www.emeraldinsight.com/lhtn.htm

Library Hi Tech News

Library Hi Tech News (LHTN) keeps one fully informed of the latest developments in library automation, new products, network news, new software and hardware, and people in technology. Published monthly and distributed ten times a year, it combines features, conference reports, regular columns, news items and a diary of forthcoming events world-wide. It represents the perfect way to stay abreast of important issues and activities in the library and information world – especially concerning IT in libraries.

Coverage includes:

The future of wireless; new library technologies and applications; staffing and training for technology;

standards for technology; and distance education and technology in education.

Benefits and features

- A permanent record of more informal knowledge in the field.
- Contrary to most newsletters, has the attraction of being published in print and online for better access.

Published in association with Aslib, The Association for Information Management

Journal

ISSN: 0143-5124 Volume: 33 Print Issues: 9 Internet Issues: 9 www.emeraldinsight.com/lm.htm

Library Management

Library Management (LM) aims to publish articles of interest and value to senior managers and academics within the library and information profession. The journal will discuss strategy and innovative developments in the management of libraries and information services. It will also include papers designed to assist in the development of research and the teaching of information and library management as an academic discipline.

Coverage includes:

Democracy and information; the future of consortia; professional leadership; and digital repositories.

Benefits and features

- Publishes a supplement in Mandarin Chinese.
- Publishes work out of major East Asian conferences.

Editor

Stephen O'Connor

Journal

ISSN: 0024-2535 Volume: 61 Print Issues: 9 Internet Issues: 9 www.emeraldinsight.com/lr.htm

Library Review

Library Review (LR) is an independent journal for all those concerned with librarianship, information transfer and communication. It aims to provide an international communication link between researchers, educators and library professionals in academic, public, company and other libraries. It describes, reviews and discusses the effects of digital library innovation on the provision of information services; reviews and analyses the communications between academics and practitioners at all levels; updates and informs on current and future projects and collaborative programmes; and publishes the results of current

research as applied by librarians and information professionals.

Coverage includes:

Hybrid and digital libraries; information literacy and e-learning; library history; library and information ethics; and training and professional development.

Benefits and features

- *LR* is a source of information on reflective practice.
- *LR* includes a substantial section of book reviews to keep subscribers up to date with new publications.

ISSN: 0307-4803 Volume: 113 Print Issues: 12 Internet Issues: 12 www.emeraldinsight.com/nlw.htm

New Library World

Charting new developments

New Library World (NLW) aims to publish articles, short communications and conference reports which will raise the level of awareness within the international library and information community of the potential for change and innovation; assist policy and decision making in the medium term (five to ten years); and help in reporting on present research, the implementation of research results, and the planning of future research.

news and views of what is to come.

Benefits and features

- In addition to articles, includes book reviews and a "What's new in libraries" column.
- Regularly publishes conference reports.

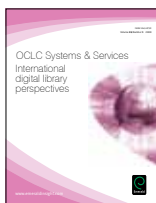

Editor

Linda Ashcroft

Coverage includes:

How libraries will be managed in the future; the changing role of the library; the changing role of the librarian/information professional; library buildings; the impact of electronic publishing; and the modern library –

Journal ISSN: 1065-075X Volume: 28 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/oclc.htm

OCLC Systems & Services

International digital library perspectives

OCLC: Systems & Services: International digital library perspectives (OCLC) is a refereed journal which aims to provide wide-ranging coverage of developments in digital libraries and digital repositories, and the web-based delivery of cultural content. The journal is intended for information professionals, librarians, educators, students, and researchers around the world to share and exchange their ideas, initiatives, and research results.

Coverage includes:

Digital libraries; digital repositories; digital cultural content services; web metadata standards; web mark-up

languages; digital preservation; imaging and digitization techniques; and usability studies.

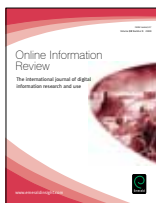

Benefits and features

- Publishes columns on Dublin Core and Systems analysis.
- Publishes themed issues to cover topics in depth.

Editor

Dr Bradford Lee Eden

Journal ISSN: 1468-4527 Volume: 36 Print Issues: 6 Internet Issues: 6 www.emeraldinsight.com/oir.htm

Online Information Review

The international journal of digital information research and use

Online Information Review (OIR) is devoted to research in the broad field of online information, including both transactional and transformational aspects, in the academic, corporate, scientific and commercial contexts.

It addresses issues related to online resources, systems and services, information quality, content and software evaluation, with a primary focus on online and digital information creation, storage, retrieval and applications. Coverage is intentionally international, with contributions from both developed and developing countries.

Coverage includes:

Search engines; indexing and metadata; authentication

and security; innovative applications of online information, e.g. in e-government, e-medicine; and web site development.

Benefits and features

- Carries opinion pieces including "savvy searching".
- Includes book reviews to keep subscribers up to date with new publications.

Performance Measurement and Metrics

The international journal for library and information services

Performance Measurement and Metrics (PMM) is the only journal devoted to performance measurement in library and information services. It aims to provide a crucial international link for all information professionals, whether practitioners or academics, addressing the issues of metrics, quantitative approaches to measurement across the spectrum as well as the qualitative aspects of the provision of library and information services.

Coverage includes:

The measurement and role of information in enhancing organizational effectiveness; quality techniques and

quality improvement; training and education; methodologies for performance measurement and metrics; standard assessment tools; and setting standards of service quality.

Reference Reviews

incorporating *Aslib Book Guide*

Reference Reviews (RR) presents reviews of new reference materials prepared by librarians for librarians. It reviews and evaluates a wide variety of publications having reference value within academic, public, school and special library settings. In addition, it seeks to provide subject bibliographers and reference librarians with information useful to the functions of collection development and assessment, readers, advice and guidance, bibliographic instruction, management, online searching and automated reference functions.

Coverage includes:

General works; philosophy and religion; social sciences; business and management; languages and literature; science and technology; arts; leisure and sport; geography, biography and history; and area studies.

Benefits and features

- Lengthy evaluations of reference works.
- Reviews are written for an international readership.

Editor

Anthony Chalcraft

ISSN: 0090-7324 Volume: 40 Print Issues: 4 Internet Issues: 4 www.emeraldinsight.com/rsr.htm

Reference Services Review

Reference and instructional services for libraries in the digital age

Reference Services Review (RSR) reviews and evaluates a wide variety of publications having reference value within academic, public, school and special library settings. In addition, it seeks to provide subject bibliographers and reference librarians with information useful to the functions of collection development and assessment, readers' advice and guidance, bibliographic instruction, management, online searching and automated reference functions.

Coverage includes:

Automation and evaluation of reference services; delivery models for reference services in all types and sizes of

libraries; development, management, and assessment of teaching/learning tools and activities; design, promotion and evaluation of information literacy programmes; and creation of partnerships with other entities to achieve reference/instruction goals and objectives.

Benefits and features

- Spans reference work and information literacy.
- Is close to the edge, particularly with the editorial articles.

Advances in Librarianship

Advances in Librarianship is a series with a long-standing reputation as a resource for current reviews of major issues or themes facing librarians and the institutions in which they practise their profession.

The series is characterized by its collection of in-depth chapters offering broad coverage of the library field over time, and an updated snapshot of specific, sometimes recurring, themes in a given volume.

It is dedicated to the publication of critical articles and surveys of specific aspects of the field of

librarianship and related subjects, based on the published literature, research in progress, and current developments, in all segments of the profession.

Coverage includes:

All areas of public, college, university, primary and secondary schools, and special libraries are given critical analysis by experts engaged in the practice of librarianship, in teaching, and in research.

Book

ISSN: 0732-0671

www.emeraldinsight.com/books

**Series Editors**

Delmus E. Williams
North Central University, USA

Janine Golden
Texas Woman's University,
USA

Advances in Library Administration and Organization

Advances in Library Administration and Organization was initiated to publish longer, research quality studies of interest both to working library managers and to scholars.

Advances in Library Administration and Organization is particularly interested in how libraries have been and should be managed, and the series continues to solicit and publish thought-provoking articles relating to both innovative and time-tested methods that can be used to organize our work.

Coverage includes:

The series publishes articles on how libraries run in all venues (academic settings, public libraries, schools and special libraries) and across national boundaries.

The subjects of the articles published vary widely, but the common theme is that the topics treated represent areas of common interest within the profession.

Book

ISSN: 1876-0562

www.emeraldinsight.com/books

**Series Editor**

Amanda Spink
Loughborough University, UK

Library and Information Science

The series solicits and publishes manuscripts which cover all aspects of the Library profession and all aspects of Information Science. This includes all operational and theoretical aspects of these fields. It covers the creation, distribution, location, acquisition, organization, storage, retrieval, and the general management of information in all forms.

Coverage includes:

Automated information retrieval; understanding reference transactions; models for library management, decision making, and planning; power laws in the information production process; link analysis: an information science approach; text information retrieval systems; looking for information; and business information needs and strategies.
