## Productivity and Performance Management

**The *International Journal of Productivity and Performance Management (IJPPM)* aims to address new developments and thinking to improve individual, group and organizational performance. It seeks to develop an understanding in and across manufacturing, service and public sector organizations.**

**The journal includes both peer reviewed research papers and a “Reflective Practice” section, which includes practical examples and case studies.**

### Coverage includes:

Organizational design and methods; performance management; performance measurement tools and techniques; process analysis; and quality and business excellence management.

### Benefits and features

- Learn about new techniques and approaches to help improve individual, group or organizational performance.
- Explore the strategic implications of performance measurement and management systems.
- Discover practical applications of performance measurement and management, in the Reflective Practice section.

## Measuring Business Excellence

The journal of organizational performance management

**To be the best in its class, a business needs to have efficient business processes, optimize resources, motivate people and satisfy customers. *Measuring Business Excellence (MBE)* provides international insights into non-financial ways to measure business performance. It is essential reading for those who need to attain sustainable competitive advantage in an ever changing business environment.**

### Coverage includes:

Balanced scorecard; business metrics; future directions; performance measurement schemes; tests for business

excellence; predictive planning; and sustainable development indicators.

### Benefits and features

- Apply the principles of business excellence to the practical day-to-day running of your organization.
- Keep abreast of key issues and emerging trends in the field.
- Participate in an international exchange of knowledge, ideas and information.

“There are many academic and professional journals but there is only one *Measuring Business Excellence*, as it successfully blends theory and practice from a practitioner’s point of view, whilst maintaining academic credibility.”

Umit Bititci, University of Strathclyde, UK

Dr Fiona Lettice  
University of East Anglia, UK

## Team Performance Management

*An International Journal*

**Team Performance Management (TPM) contributes to the successful implementation and development of work teams and team-based organizations by providing a forum for sharing experience and learning. The journal seeks to bridge the gap between research and practice by publishing articles where the claims are evidence-based and practical. TPM also helps readers to successfully implement and develop work teams through its mix of case studies, application papers and reviews.**

### Coverage includes:

Team-based organizations; measurement, rewards and compensation; information systems; successful team building; learning organizations; and knowledge management.

### Benefits and features

- The journal publishes case studies on teaming from a variety of industry sectors.
- TPM's content is keenly-focused on managerial relevance.

Comprising three highly specialist journals, this collection makes a significant contribution to research and practice, receiving nearly half a million downloads annually and featuring internationally recognized names, including Professor Andrew Neely at University of Cambridge (UK) and Professor André A. de Waal at Maastricht School of Management (The Netherlands).
