

INDEX

- Adrenaline, 76–77
- Aggression, 60
- Brain science
 - ability, 49
 - adrenaline, 76–77
 - chemistry, 62–69
 - co-creation, 78–85
 - dopamine, 69–70
 - effective leadership, 85–88
 - emotions, 55–62
 - endorphins, 71
 - hormones, 62–69
 - neuroleadership, 50, 51
 - noradrenaline, 72–74
 - practical utility value, 74
 - serotonin, 74–75
 - TRePP model, 82, 83
- Burning desire, 32–35
- Business organization
 - chain of associations, 108–110
 - continual cascades rules, 99–101
 - crossing boundaries, 102–103, 104–108
 - Fourth Industrial Revolution, 98, 102, 117
 - functional organization, 110–113
 - intelligent robots (*See* Intelligent robots)
 - reliability and trust, 104
 - talent-flocking, 113–116
- Chemistry, 62–69
- Co-creation, 78–85
- Commitment triggers, 83
- Connectedness, 16–18
- Contagious effect, 33
- Continual cascades, 5, 99–101
- Cooperation, 123
- Creativity, 107
- Cultural neuroscience, 84
- Digitization, 19, 98
- Disruptive leadership, 18–21
- Distorted emotions, 56
- Dopamine, 69–70
- Economic bubbles, 3
- Emotions, 55–62

- Endorphins, 71
- Evidence-based knowledge, 133–138
- Financial management, 145
- Fourth Industrial
 - Revolution, 2, 98, 102, 117
 - burning desire, 32–35
 - business, 21–25
 - connectedness, 16–18
 - disruptive leadership, 18–21
 - Drucker’s theory, 9
 - human factor, 25–29
 - informat, 11–12
 - intellectual experiment, 14–16
 - intelligent robots, 11–12, 12–14
 - leadership, 10
 - leadership role, 29–32
 - leadership tool, 14
 - mastery, 35–37
 - practical utility value, 14
 - theoretical point, 14
- Front-line organization, 106
- Functional organization, 110–113
- Hormones, 62–69
- Human factor, leadership, 25–29
- Individual businesses, 103
- Innovation economy
 - characterization, 2
 - communication, 1
 - continual cascades, 5
 - economic bubbles, 3
 - Fourth Industrial Revolution, 2
 - political leadership, 123–147
 - value creation, 1, 4, 123–147
- Instagram, 18
- Intellectual experiment, 14–16
- Intelligent robots, 12–14, 97–118
- Interconnection, 19
- Knowledge-based innovations, 105
- Leadership
 - burning desire, 32–35
 - business, 21–25
 - connectedness, 16–18
 - disruptive leadership, 18–21
 - effective leadership, 85–88
 - human factor, 25–29
 - intellectual experiment, 14–16
 - intelligent robots, 12–14
 - mastery, 38–40
 - program development, 40–41
 - robotization, 19, 20
 - roles, 29–32
- Mastery, 38–40
- Neuroleadership
 - chemistry, 62–69

- emotions, 55–62
- hormones, 62–69
- research, 51
- scientific foundation, 51
- Neuroscience, 53
 - culture, 84
 - definition, 52
 - leadership, 54
- Neurotransmitters, 68
- Noradrenaline, 72–74
- Political leadership,
 - 123–147
 - cooperation, 123
 - evidence-based
 - knowledge,
 - 133–138
 - historical background,
 - 125–127
 - research, 125
 - scientific method, 137
 - social problems
 - solutions, 138–146
 - social system
 - cohesiveness,
 - 130–133
 - society, 124
 - systemic perspective,
 - 125, 126
 - vision, 127–130
- Practical utility value,
 - 74
- Predatory aggression,
 - 60
- Reliability, 104
- Robotization, 19
- Serotonin, 74–75, 74–76
- Social cognitive
 - neuroscience, 81
- Social neuroscience, 81
- Social system cohesiveness,
 - 130–133
- Stress, 57
- Super-intelligent robot,
 - 13, 14
- Systemic perspective, 125,
 - 126
- Talent-flocking, 113–116
- Technological singularity,
 - 12
- TRePP model, 82, 83, 88
- Trust, 104
- Value creation, 1, 4,
 - 123–147
- Vision, 127–130
