

## *List of Tables*

### Chapter 2

Table 1	Descriptive statistics for meat demand variables, 1960–2004	51
Table 2	AIDS and log translog model parameter estimates for quarterly US meat demand with seasonal dummy variables and autocorrelation corrections, 1960–2004	53
Table 3	Measures of fit for estimated AIDS and log translog models	54
Table 4	Estimated Marshallian, expenditure, and Hicksian elasticities for the estimated AIDS model	55
Table 5	Estimated Marshallian, expenditure, and Hicksian elasticities for the estimated log translog model	55

### Chapter 5

Table 1	Price, quantity, and socioeconomic summary statistics	140
Table 2a	Maximum likelihood estimates of the own-price elasticities of marginal rates of substitution	142
Table 2b	Maximum likelihood estimates of the own-price elasticities of marginal rates of substitution	143
Table 3	Maximum likelihood estimates of the expenditure elasticities of marginal rates of substitution	144
Table 4	Average price and income elasticities of demand	144

### Chapter 11

Table 1	Unit root tests	304
Table 2	Estimated conditional mean (HAR(1)) and conditional volatility models	309
Table 3	Estimated conditional mean (HAR(1,7)) and conditional volatility models	310
Table 4	Estimated conditional mean (HAR(1,7,28)) and conditional volatility models	311

## Chapter 12

Table 1	Summary statistics	340
Table 2	Parameter and welfare estimates	342

## Chapter 13

Table 1	Equivalence scales derived from econometric models	354
Table 2	Survey-based equivalence scales	354
