

INDEX

Note: Page numbers followed by “n” with numbers indicate notes.

- Abstract theory of cognitive change processes, 127
- Abuse (ABU), 44
 - childhood, 184
 - maternal alcohol abuse, 38
 - substance, 38, 46–47
 - of women, 40, 48, 50–52
- Academy of Breastfeeding Medicine (ABM), 190
- Adaptations, 176
- Adherence Counselor for Health and Nutrition, 42
- Adolescence, 205
 - maternal warmth and communication in, 212
 - school disconnectedness in, 211
- Adolescent to Adult Health (Add Health), 204, 210–211
- Adulthood, transition to, 204–205
 - analytic approach, 212–213
 - conceptual model, 206–210
 - control variables, 212
 - data, 210–212
 - depressive symptoms in emerging adulthood, 211
 - descriptive statistics for overall sample, 213–214
 - differences by race and ethnicity, 213–222
 - hypotheses, 210
 - maternal warmth and communication in adolescence, 212
 - race and ethnicity, 212
 - school disconnectedness in adolescence, 211
 - summary statistics for analytic sample, 214
 - theoretical frameworks, 205–206
- Adverse parenting behaviors, 38
- Age, 8, 83, 212
- Alcohol abuse, 38
 - in SA and Western Cape Province, 39–40
- Alcohol use during pregnancy (AUDP), 38, 44
- Anxious toddlers, 182
- Asian adolescents, 213, 222
- Asian mothers, 208–209
- Attachment
 - co-sleeping related to, 181–182
 - theory, 128, 130, 143, 175, 188
- Attention to variability, 127, 136
- Authoritarian parenting, 234
- Bedsharing, 174
 - infants, 180
- Bedtime protests, 191–192
- Behavioral interventions, 122
- Biracial children, 19, 21, 29, 32, 33
 - in United States, 32
- Biracial couples, 30
- Biracial/ethnic couples, 21
- Biracial/ethnic relationships, 18, 21
 - women in, 22, 31–32
- Black adolescents, 213, 219
- Black male–female relationship, 104
- Black mothers, 20, 29, 104, 116, 209
- Black students, 207–208
- Body contact, 177–178
- Borderline Personality Disorder (BPD), 139
- Breastfeeding, 186–187
- Caring for Body and Mind in Pregnancy* (CBMP), 128, 130
- Chi-square analysis, 87

Child

- abandonment and neglect, 58
- characteristics, 5–6, 8
- development, 43
- difficult child and parenting stress, 4–5
- father, experiences with, 28
- independence, 188
- neglect in WCP, 40
- rearing practices, 124

Child-rearing

- in Taiwan, 233–235
- in three-generation families, 230

Childhood

- abuse, 184
- survival, 176

Children

- behavior, 5
- communication skills improvement with, 54–56
- into “generational line” and extended family, 159–160
- psychopathology, 126

Circle of Security (COS), 128, 130

- COS-M, 128, 130

“Clingy” behavior, 181

Co-residency, 236

- parents, 6, 13

Co-sleeping, 174–175

- arrangement, 178
- benefits of co-sleeping for infant and parent health, 186–188
- into developmental theory, 175–185
- mothers and infants, 181
- nature of, 182–183
- as normal developmental context, 180–181
- parenting universals and, 176–180
- related to attachment, 181–182
- risks of co-sleeping for infant and parent health, 188–190
- role in family, 176
- Western controversy over, 185–190

Cohabiting couples, 95

Commitment, 81

- scholarship, 81

Commitment Inventory, 84

Commitment theory, 79

- and coparenting, 79–82

Communication skills improvement

- with children, 54–56

Comparative fix index (CFI), 87

Compassion for self and child, 123

Coparenting, 88

- analytic approach, 85–87
- association between parental commitment and, 82
- commitment theory and, 79–82
- dataset, 83–84
- descriptive statistics, 88–95
- disagreements, 105
- limitations, 95–96
- measures, 84–85
- potential confounding factors, 82–83
- relationships, 78, 109
- sample, 84
- support, 110
- trajectory, 87, 90, 91–92

Cortisol, 184–185

Cost-of-basic-needs approach, 37

Counseling Program (CP), 36, 42–43

Crib, 185

Crying, 184

Depression, 205

Depressive symptoms, 204–205

- in emerging adulthood, 211
- factors shaping by race and ethnicity, 216–222
- factors shaping depressive symptoms, 215–216
- OLS regressions, 216, 220–221

Descriptive statistics, 8–9, 85, 88

- coparenting, 88
- independent variables, 93–94
- latent growth curve model of mothers’ coparenting trajectories, 92
- maternal reports of coparenting, 94–95
- multivariate results, 90–91

- parental commitment, 88
- time-invariant covariates, 90
- time-varying variables, 88
- weighted means/percentages and standard deviations, 89–90
- Developmental theory, co-sleeping into, 175–185
- Discrimination, 206
- Distress within coparental system, 105
- Doing family, 230–232
- Doing gender, 232
- Domestic abuse, 45–46
- Early childhood development (ECD), 40
- Early Childhood Development and Aftercare (ECDA), 42, 47, 59
- Early co-sleepers, 188
- East Asian children, 209
- Educational goals and strategies, 160–162
- Emerging adulthood, 205–206, 210
 - depressive symptoms in, 211, 213, 215–217, 219–220, 222–223
 - racial socialization, 224
- Emotional awareness of self and child, 123
- Emotional issues, 45
- Emotional security, 188
- Employment status, 3, 5–8
- Ethnicity, 5, 8, 206, 212
 - differences, 213–222
 - factors shaping depressive symptoms, 216–222
 - mother-child relationships in adolescence—differences by, 208–209
- Extended family, children into, 159–160
- Family
 - background, 83
 - dynamics in daily life, 230
 - experiences, 27–28
 - family-friendly policies, 14
