INDEX

Abusive supervision, 120
  Affective Events Theory (AET) and, 122–123
  attitude formation and perception of, 126–127
  boundary conditions and contributions, 130–131
  emotional contagion and, 124
  implications, 131–133
  role of negative affect in, 121–122
Acquaintances. *See* Peripheral relationships
Adaption, 6
Adaptive cognition, 35
Affect
  activation levels of, 5
  bifurcation model of, 6
  function of, 5
  in organizations, 40–41
  See also Pleasant and unpleasant affect, analysis of intensity of
Affect-driven behaviors, 125–126
Affective events theory (AET), 122–123, 192
Affective team climate, 195–196
Amygdala, 35, 39
Approach-*versus*-avoidant coping strategies, 219
Artificial intelligence (AI), 60
Authenticity, 63–64
Autonomous vehicles, 60

Behavioral approach system (BAS), 8
Behavioral emergence, 44
Behavioral inhibitory system (BIS), 8
Biotechnology, 60
Brain–body relations, role in organizational behavior, 28–29
  control of organizational activities, 42–46
  future research, 47–50
  intra-individual perspective, 30–31
  as a mediator, 45
  microdeterministic view of, 44
  social isolation and, 40–42
  socially situated perspective, 30–31
  without bodies, analysis, 31–35
  without extracranial resources, analysis, 35–40

Chairing a meeting, 41
Cognition, role in organizational behavior, 40–42
Cognitive-affective systems, 29
Cognitive scaffolding, 38
Collective mind, 41
Complexity leadership theory (CLT), 67
Computer-mediated communication, 166
Conservation of resources (COR) theory, 191
Corporate corruption scandals, 49
Counterrole identity, 74
Cross-border business activities, 163–164
Crowds, contagious power of, 251–252

Cultural differences, emotional contagion and, 251–254

Decision architects, 48
Digital natives, 166
Digital transformation leaders, 61
Disappointment, 77
Dissipative structure theory, 6, 8
Distributed knowledge systems, 40
Dorsolateral prefrontal cortex (DLPFC), 42
3D printing, 60
Dual control, 43, 45

Embodied emotional experience, 33
Embodiment
  embodied simulation, 33
  off-line, 32
  on-line, 32
  in organizational behavior, 33–34
    construction of organizational identity, 34
    eliciting facial expressions, 34
    gesturing, 33
    implications for theorizing, 34–35
Emergent (co)determinism, 44–45
Emotional congruence, 142
Emotional contagion, 41, 75, 120, 124, 198
  attributes related to, 124–125
  definition, 247
  EC communicators and, 254–255
  future research, 254–255
  implicit and explicit, 131
  mechanism of, 248–249
    cultural differences and, 251–254
    gender differences and, 250–251
    in organizational settings, 249–250
    power and being sensitive to others' feelings, 251
  primitive, 247
Emotional Contagion Scale, 247
Emotional distress, 218
Emotional granularity, 219
  experience of, 229–230
  task and social engagement and, 229–230
Emotional intelligence, 65, 68, 72
Emotional labor, 75, 120
Emotional oscillation, 219
  experience of, 225–227
  task and social engagement and, 227–228
Emotional self-organization theory, 4
Emotion regulation, 73, 75–76
  extrinsic interpersonal, 107
  interpersonal, 105–112
  intrinsic interpersonal, 106–107
  in manager–employee relationships, 81–83
  response-independent intrinsic, 99
Emotions, 4
  bodily expression of, 35
  creative problem solving, role in, 261
  creative thinking and, 260
  decision-making and, 99–100
    financial, 100–101
    trading, 101–105
  economic decision-making, impacts on, 4
  entropy–energy dependency and, 6–9
  foundations of, 246
  gesturing and, 33
  organizational behavior, role in, 40–42
  in organizational settings, 4
  oscillating model of. *See* Emotional oscillation
  self-organizing process and, 6–9

signal functions of, 78
social functions of, 77–78
social sharing of, 107
taxonomy of, 246–247
theories and hypotheses, 5–9
in virtual work arrangements, 167–170
See also Virtual teams (VTs) and virtual communication
See also Pleasant and unpleasant affect, analysis of intensity of
Emotions as social information model (EASI), 84
Empathy, 65
Employee oriented leadership, 194
Energy storage, 60
Entropy–energy dependency, 4–5
emotion and, 6–9
Extracranial resources, role in organizational behavior, 35–40
Extrinsic interpersonal emotion regulation, 107, 111–112

Face-to-face interaction, in cross-border acquisitions, 178–180, 182–183
Financial decision-making, role of emotions, 100–101
Fourth Industrial Revolution, 60
Friendship deterioration on engagement, study of effects of, 218–219
building of model, 219–220
conceptualizing, 222–223
dyadic relationships and, 233
positive organizational scholarship (POS) perspective, 233–234
three-stage dynamic recovery model, 219–220, 223–230
approach-*vs* avoidance-coping style, 231–232
emotional granularity, experience of, 229–230
emotional oscillation, experience of, 225–227
loss-focused emotions, experience of, 224–225
moderators, 230–232, 234
number of friendships and stayer's emotional responses, 230–231
outcomes of emotional recovery process, 234
practical implications for organizations, 235–236
Frontopolar cortex (FPC), 43
Functionality, 4

Gender differences, emotional contagion and, 250–251
Gesturing, 33–34
emotion and, 34
metaphoric or "iconic" gestures, 33
retention ability and, 33
role in shaping mental states, 33
Global virtual teams (GVTs), 165

Higher-level mental events, 43
Higher-order psychological states, 43
"High stress" occupations, 191
Hot cognition, 40
Hybrid professionals, 72
Hysterical contagion, 253

Ideal self, 144
Identity control theory, 74
Identity theory, 73–75
Implicit Leadership Theories (ILTs), 121–123, 132–133

influence of negative emotional processes, 122–123
moderating effects of, 127–130
Impulsiveness, 49
